# React Router

Presented by

Claudia Rodríguez

Why do we want to use react-router?

It is a must for SEO

Makes it possible for our users to add specific pages of our page to their bookmarks.

Makes it possible for our users to share specific pages.

Which problem is solved by react-router?

Server   **Client**   **Server**   **Client**

Overview

```
<BrowserRouter>
  <Routes>
    <Route index element={<HomePage />} />
    <Route path="join-our-team" element={<JoinOurTeamPage />} />
    <Route path="contact-us" element={<ContactUsPage />} />
    <Route path="create-post" element={<CreatePostPage />} />
    <Route path="post/:postId" element={<PostPage />} />
  </Routes>
</BrowserRouter>
```

Let's code!
